Redacted patient correspondence and clinical research notebooks in the papers of Bob Edwards, IVF pioneer

Between 2024 and 2026 Churchill Archives Centre carried out a project to make some closed parts of the Papers of Sir Robert Edwards available in a redacted form. The relevant sections are "patient matters" correspondence from 1969-2010 (reference EDWS 1/6, 24 files/2.5 archive boxes) and clinical research notes from the development of IVF 1968-1978 (reference EDWS 2/2, 21 volumes and 19 files/5.5 archive boxes) which are currently closed in their original form because they contain sensitive personal information.

When looking at the digitised files please note:

- We did not photograph blank pages. Sometimes one side of the page was used, and sometimes both sides were used.
- We redacted where names showed through from the other side of paper (in the notebooks) but did not add patient numbers to these redactions. These redactions are in series EDWS 2/2/1/1, notebooks 2/2/1/2/5-2/2/1/2/8 and 2/2/1/3-2/2/1/4, and files 2/2/2/1-2/2/2/2, one in 2/2/2/6, 2/2/2/7-2/2/2/8

Note on the below table:

As part of the project individuals were given patient numbers so that cross references can be made between files. In some cases, a letter appears after the number which means that only a surname had been used and it wasn't completely clear which patient the record relates to. The number given is our best guess.

The numbers in brackets after the reference numbers refer to how many letters in a file, pages in a notebook, or loose pages of clinical research notes include details of that patient, if they appear more than once. If there is no number in a bracket after the file reference this means that the patient only appears in once in that file or volume.
